# School Access Route Plan

## Taylor Elementary School

In accordance with state standards, Taylor Elementary School has identified school access routes for School students who live within the walking boundary established for the school. A map showing the identified routes can be viewed by following the link below. (Insert a link or give other instruction on how to access the map)

The intent of a School Access Route Plan is not to identify every school access route or to identify the more convenient school access routes; it is to identify main walk/bike routes that appear to be secure. Care has been taken to consult with local law enforcement, school PTA and School Community Council representatives, and the District's traffic safety committee in establishing these school access routes. Despite broad consultation and unanimous agreement from all parties involved in establishing these routes, no one, including the Nebo School District and Taylor Elementary School can guarantee that the agreed upon school access routes are or will ever be completely free from hazards.

Parents are encouraged to walk or bike the school access routes with their child/children, to address specific concerns they may have, and to instruct their child/children to obey the laws and rules pertaining to pedestrian safety. If a parent feels their child/children should use a school access route that is not identified in this plan, it is their prerogative to instruct their child/children as to what they feel is best for them.

As previously stated, the intent of a School Access Route Plan is not to identify every school access route or to identify the more convenient school access routes. For this plan, school access routes leading to the school from areas where clusters of students live, have been identified and are described below.
